

Hazardous chemical register

List every hazardous chemical used, handled or stored at the site. Keep the current SDS for each one with this register.

Business name		Site / worksite		Contact person		Register last reviewed (date)		Reviewed by				
Product name (as on label and SDS)	Manufacturer or importer	Supplier	SDS revision no.	SDS date last reviewed	Review due (+5 years)	Hazard info (signal word, GHS / DG class)	Location	Typical qty	Used for	Date added	Where the SDS is kept	Comments

The law (model WHS Regulations, regulation 346) asks for a list of the hazardous chemicals used, handled or stored at the workplace and the current SDS for each. Every other column is good practice. Review due = five years after the date the SDS was last reviewed (usually in Section 16); past that date, ask the manufacturer or supplier for the current SDS. Victoria: the Occupational Health and Safety Regulations 2017 apply. General information, not legal advice. Free template from supplysafe.com.au · Page 1 of 2
